

**NOTICE REGARDING THE USE OF CHILDREN'S TYLENOL, CHILDREN'S MOTRIN and TUMS**

**Elementary Parents,**

In the Elementary environment, the students sometimes experience minor aches, pains, headaches, or indigestion that do not necessitate their dismissal from school. When a student is too ill to remain in the classroom you will be notified, however when the symptom is minor we ask permission to administer Children's Tylenol, Children's Motrin, or Tums, depending on the symptoms, to see if they are able to continue with their day at school. In the event that any medications are administered, it will be stated in an incident report.

By checking the boxes and signing this permission slip, you are allowing the staff of MISD to administer the following to your child:

- Children's Tylenol
- Children's Motrin
- Tums

I, \_\_\_\_\_, agree to allow the teachers/staff at the Montessori Institute of San Diego Children's House to administer the above checked medications to my child, \_\_\_\_\_, in the event that it is needed to alleviate minor aches, pains, and headaches.
