

NOTICE REGARDING THE USE OF ARNICA

Toddler Classroom Parents

In the Toddler environment, the children are in the process of perfecting their movements and coordination. As this is a process, it can sometimes result in tumbles and falls and bumps and bruises. By licensing law, childcare centers are not permitted to apply any ointments or creams when a child has been injured.

By signing this permission slip, you are allowing the staff of MISD to apply Arnica when your child has a bump or bruise. Research shows that Arnica, an herbal cream, reduces inflammation and bruising and soothes muscle aches. In the event Arnica is applied to your child, it will be stated on the Accident Report.

I, _____, agree to allow the teachers/staff at the Montessori Institute of San Diego Children's House to apply Arnica to my child, _____, in the event that it is needed to soothe his/her skin.
